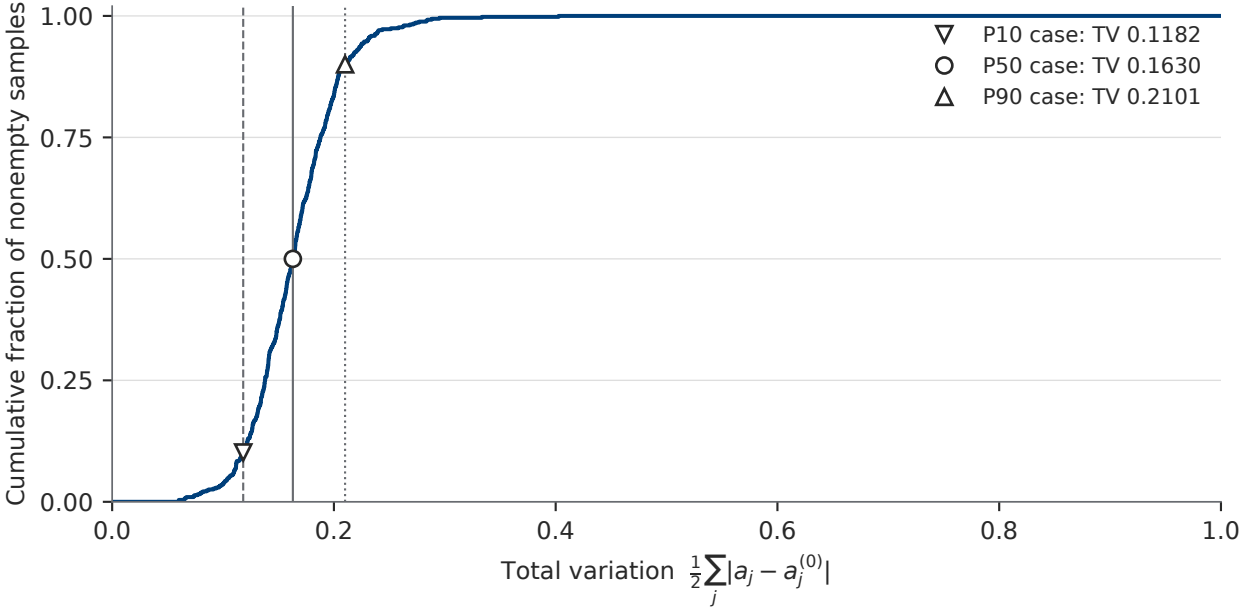
HiFormer–TencentGR: attention-change distribution

Same checkpoint · seed 20262028 · target attention · head 0

512 fixed-window diagnostic samples · 512 nonempty histories · head 0



Fixed windows: not a representative full-test sample. Empty histories excluded from the ECDF.

Same-checkpoint comparison, not an independently trained baseline. FP32 reconstruction.

TV measures redistribution magnitude; it does not measure prediction improvement.
